Comms & Engagement	A. Nelson/ N. Samuels						Complete Plan	Engagement sessions	Initiate regular newsletter				
								Secure additional	Engagement Sessions				

Governance - Triple Lock sign off

1. Triple Lock of Sign off – to provide governance assurance for OCP and AMSR

Governance - Highlight Reports and RAID

Since June – all AMSR workstreams produce fortnightly highlight reports, RAIDs and Gantt charts

The leads submit and brief the fortnightly AMSR Board -

decisions/actions and risks are captured in the AMSR Highlight report and RAID for UEC

ACUTE MEDICAL UNIT WORKSTREAM REPORT

Presented by: Liz Davies/ Tal Anjum/ Fiona Hughes
Date:

This report provides an overview of key activities from the AMU Workstream. It will provide key updates, monitor progress, and identify any high level risks and/or areas of concern. A report will be generated on a weekly basis to be presented at the AMSR Programme Board.

Fortnightly Summary

The most recent update is presented below:

- Reflections review has been carried and the team have created a number of actions with the main focus of structure of the day
- Business Informatics have produced LOS and Discharge data – providing number of discharges required to maintain flow in AMU – see below
- The SOPs are ongoing – a decision has been submitted to have the following
 - a. AMU Assessment – 19th Sept
 - b. AMU Assessment and SDEC SOPs joint review with SDEC booked for 13th Sept
 - c. AMU Short stay – 19th Sept
 - d. SDEC – being completed by the SDEC work stream 5th Sept
- Review of allocation of rooms for Therapies and Pharmacy has been carried out in 23rd Aug weekly session and raised as decisions for AMSR Board 6th Sept
- Suite of Unlocked adverts for all acute medical staffing adverts have been re-written and shared
- Review by Triage subgroup to train and use Manchester triage as a baseline for the unit and develop once the unit has been established.

AMU Sub-group updates

The most recent updates from each sub-group is presented below:

SUB-GROUP	UPDATES
Reception Lead: Rebecca Davies/Tyina Powell	The actions from this group has completed the majority of tasks and it will be reviewed on 30 th August and will now combine with Triage sub-group
Triage Lead: Alison Gallagher	The Triage sub-group has restarted Sara Morgan as leads and has decided to combine Reception group
High Acuity Lead: Fiona Hughes/Chris Hudson/Tal Anjum	The decision has been made at AMSR Board 16 th Aug to absorb the high acuity into the assessment unit
AMU Lead: Liz Davies/Sara Morgan/Rebecca Davies	Summary report of the NBT AMU visit, the report is being reviewed on 18 th August AMU Discharges Therapies room AMU weekly session Request 22nd August justification VS with 23rd August decision Attached is the summary report for 23 rd August providing the minutes to reflect the decision requests for room allocation and to move therapies on 12 th September with an attached Therapies paper

SPECIALIST WARD WORKSTREAM REPORT

Presented by: Rhodri Edwards/David West
Date: 1st September 2022

This report provides an overview of key activities from the SPECIALIST WARDS Workstream. It will provide key updates, monitor progress, and identify any high-level risks and/or areas of concern. The workstream will also use dedicated RAID document which will be updated and where decisions can be presented for sign off by AMSR Programme Board.

Fortnightly Summary

The most recent update is presented below:

- The following sessions have been carried out and are summarised in the respective sections
- To finalise the clinical coverage for Singleton wards – Rhodri Edwards and Manju Krishnan are hosting a meeting on Tuesday 7th September
- First draft SOP for Singleton wards has been completed for review 18th August

SPECIALIST WARDS Sub-group updates

The most recent updates from each sub-group is presented below:

SUB-GROUP	UPDATES
Reconfiguration Lead: Rhodri Edwards/Alastair Nelson	1. Meeting was held on the 17 th August with a number of clinical specialist leads and representatives. Below is summary report and minutes of the meeting Speciality Ward and Post AMSR Bedbase Attendance register distribution meeting 1 Reviewed 18th August 17th August meeting 2. Unable to finalise the consultant coverage against all the AMSR wards as a number of representatives were unable to confirm for their colleagues 3. A follow up meeting has been arranged for 7 th September with all clinical leads to finalise.
SOP & QA Lead: Sarah Gane	1. Action plan has been created for finalizing the SOPs for clinical governance through the Singleton and Morriston cabinets by 3 rd week of September

AMU WORKSTREAM - WEEKLY SESSION

Chaired by: Alistair Nelson
Date: 06.09.22

This report captures the key comments and actions from the weekly AMU weekly session
Attendance register -

Key comments to Highlight / Escalate/actions

The most recent updates presented below:

- Reviewed the AMU Highlight Report for AMSR including RAID

AMU Highlight report, Prog Board 68

- Confirmed the decisions to be submitted to AMSR Board
- Reviewed the updated Acute Assessment Unit SOP.
- Nicky Leopold stated that the numbers don't add up for the targeted discharge goals per day;

- How many patients per day do we need to discharge by what times of the day so we can set targeted goals for the AMU say at 9, 12, 4, 8pm based on admission profiles?
9am - 12pm = 8 a day
12pm - 4pm = 2 a day
4pm - 8pm = 2 a day
8pm - 9pm = 2 a day

- How many discharges do we need per day from the downstream wards to enable flow through the system and do we know that by specialty?
8 a day

Digital Intelligence - AMSR Discharges Required

- Update on the numbers are based on percentiles and with percentiles there is no fixed numbers

- A clinical desk clinician will be set up.
- Information regarding Stroke Pathway not mentioned on the SOP.
- Tal Anjum confirmed that the unit will be set up for Pre-Alerts and direct referrals from WAST. Recognised the need for final clarity with WAST.

AMSR Programme Board
6/09/2022 @ 12:00-14:00

Key Messages from AMSR Programme Board held 6th Sept 2022

Workstream	Areas of Focus August 2022 from AMSR workstreams	
OCP	AMSR Consultation Impact consideration document completed 11 th August for executive review and signed off 5 th September 2022 for issue 8 th September 2022. Preparations for preference assessment in place.	
AMSR Board	AMSR Implementation date delayed from original timetable to 1 st December 2022 to allow 12 weeks notice from response document – all planning documents have cited end November/start of Dec so remains on track	
AMSR Operational	Go-No Go Criteria shared in July to UEC Board has been agreed, targets and trajectories in development and RAID document in place to govern key tasks and actions	
AMSR Operational	Draft transitional plan developed with RAID log and Singleton transitional plan completed	
AMSR Operational	EOI closed for clinical leadership role – interview date to be set in Sept based on Executive MD availability	
Workforce	Medical rotas – draft consultant rota co-produced with nominated specialty leads and shared widely at medical forum – finalisation through Sept	
Workforce	Medical rotas – meeting held with HIW regarding principles of JD rotas internal review of rotas planned for 13 th September 2022	
Acute Hub	AGPU moved into the Acute Hub 23 rd September; AMU works complete with finalisation of nurse call zoning in Sept '22	
AMU	Visit to NBT to review model AMU/SDEC in August – completion of SOPs for SDEC/AMU -table top exercise with facilitated workshop end Sept '22	
AMSR operational	Draft LOS and discharge requirements complete for table top review	
Workforce	Completion of all workforce templates including draft workforce plan – update of adverts to promote new unit complete	
SDEC	Admission avoidance schemes – further extension of WAST stack review with APP in place	
AMSR operational	Comms – weekly newsletters in place – Freshwater developing story boards and internal posters for the programmes and comms champions embedded	

OCP Overview and Implementation Date

OCP concluded 29th July 2022 – extensive engagement during 6 week process – 61 sessions held (at least 500 staff attended); 140 formal responses through the OCP channel from individuals, departments, staff groups, unions. Comms via videos and bulletins (10,909 and 2,621 views) and FAQ and AMSR newsletter. In excess of 120 pages reviewed to inform the response which was issued 11th August for exec scrutiny.

Original Timeline detailed in the OCP – implementation date estimated at 7th November following original OCP timeline

STAGE	ACTION	REVISED COMPLETION DATES FOR Nov
<i>Consultation Stage</i>	Consultation start date	13.6.22
	1-1s, staff meetings to take place during this period	13.6.22 - 29.7.22
	Consultation end date	29.7.22
	Post Consultation evaluation	29.7.22 - 12.8.22
<i>Notice Period / Implementation</i>	Notice of Change and Final Model Issued in writing	12.8.22
	Notice Period (7 weeks)	
	New rotas, change forms, excess mileage, JDs, IT equipment, induction, training to be arranged during this time	12 weeks
	Implementation Date	7.11.22

OCP Update – OCP document submitted for executive scrutiny by 11th August deadline. Review completed by 5th September – to be issued Thursday 8th September 2022.

Agreed changes from feedback – Dyfed and phased approach to weekend consultant presence on specialist wards.

Other issues raised feedback into relevant workstreams to inform the development of the model.

Revised Implementation date based on 12 weeks notice as advised by HR from 8th September 2022 will be Thursday 1st December 2022

Working assumption by the AMSR Programme Board and subsequent workstreams has been an implementation date of end of November/first week in December so this fits in with the planning assumptions

Go – No Go Criteria

1. “Go – No Go” Using the “Go – No Go” criteria developed through the AMSR Board based on known programme risks, the programme has produced a dedicated RAID document capturing the risks and mitigation, actions and decisions for the criteria below is the copy of the Risk log where using the criteria points as risks, the team have scored the risks and described the mitigations to reduce the risk levels. Below is section of the Risk log for Go-No Criteria

Risk ID	Date Added	Risk Owner/workstream	Risk Description	Risk Impact	Risk Likelihood	Risk Score	Risk Proximity	Mitigating Action (MA)	Post MA Risk Impact	Post MA Risk Likelihood	Post MA Risk Score	Risk Actioner	Date Reviewed	Status
OCP														
						0					0			
1	10/08/2022	OCP	Opposition to seven day working proposal(s)	5	5	25	up to a month	Following the OCP consultation - 7 days stipulation has been removed	0	1	0		16-Aug	Closed
2	10/08/2022	Specialist	Proposed rotas deemed unacceptable in terms of frequency/intensity	5	4	20	up to a month	new rotas have been produced and agreed by the consultant body	1	1	1		16-Aug	Open
3	10/08/2022	Specialist	Inadequate detail on how jobs will work- what does job plans look like, offices, which wards(5)will people work on etc.	5	4	20	up to a month	The wards have been agreed including the transitional Singleton wards - 4-6-8 for clinical teams to cover, specific deliverables for space accommodation	2	2	4		16-Aug	Open
4	10/08/2022	Estates	Future base (office) for staff unclear	3	4	12	up to a month	Use of the agile working and new AMU has additional admin areas	2	3	6		16-Aug	Open
5	10/08/2022	OCP	Appeals process leads to delays	4	3	12	up to a month	During the OCP process no appeals from the Unions were made and BMA concerns have been responded to	2	2	4		16-Aug	Open
Staffing														
						0					0			
6	10/08/2022	workforce	Failure to start the recruitment process	4	4	16	up to a month	Workforce workstream started the recruitment for all posts with high vacancies	2	2	4		16-Aug	Open
7	10/08/2022	workforce	Inability to recruit to additional posts	3	3	9	up to a month	Recruitment campaigns started and regular updates from sub groups allow the workstream the gaps	2	2	4		16-Aug	Open
	10/08/2022	workforce	High level of retirements/retirements	4	4	16	up to a month	workforce sub groups monitor the vacancies and provide regular updates to workstream and AMSR Board	2	3	6		16-Aug	Open
	10/08/2022	workforce	Too many staff wish to stay at Singleton	4	4	16	up to a month	Through the sub groups, the feedback is positive on the number of staff who are happy to transfer. However certainty will be given through OCP preference exercise	2	2	4		16-Aug	Open
	10/08/2022	AMU	inadequate induction	4	3	12	up to a month	AMU subgroup for ward moves are developing plans for induction and staff have been made aware of new AMU unit through video and visits	2	2	4		16-Aug	Open
	10/08/2022	AMU	inadequate team building	3	3	9	Select	AMU sub group - ward moves are working with OD on the team building. SAU team are suggesting them are moving all together	2	2	4		16-Aug	Open

1. The decision for “Go – No Go” will be based on the following criteria

- a) Medical beds occupied
- b) Medical emergency admissions
- c) LOS
- d) Clinical and nursing staffing resources
- e) Financial impact on potential additional workforce costs
- f) Potential impact of Industrial action

Further work to clarify the key targets and trajectories for the criteria is underway with support from BI and will be shared with UEC Board for initial approval

2. Key enabling actions

- a. Implementation of virtual wards and Home First Schemes
- b. Implementation of SAFER bundle with ‘no delay’ philosophy and targeted work to increase weekend discharges through ‘criteria led discharge’
- c. Implementation of navigator role in ED to SDEC
- b. Pre-Hospital admission avoidance initiatives – collaborative working with WAST to develop direct admission pathways and conveyance avoidance

Management Board 21/09/22

Initial Project Assurance Goals

UEC AMSR Program

- Health Check of the UEC Acute Medical Services Redesign Programme against expected outcomes and benefits
- Stress test and challenge the future state and existing staffing productivity modelling
- Identify project areas of weakness and/or risk that require further support
- Assessment of “Table 6: Bed Resource Requirements for AMSR and Mitigations”

© MERIDIAN PRODUCTIVITY 2022

Resource Model Stress Test Summary

- Significant work has gone into modelling the resource required to meet the “To-be” state
- “To-Be” looks relatively robust with known risks
 - Consultant Rota
 - Nursing Substantive staffing levels
- OCP process has been robust in covering the changes to staff

Project Health Check - Key Risks

Project Operating Model

- × Limited Project Resources
- × Tight Timeline on Implementation Plan
- × Dependency on project to deliver Winter Pressure outcomes
- × Some areas appear to still be in the planning phase
- × Longer term detailed planning required through to 2023

Project Governance

- × Multiple project leaders over the last few years
- × KPI tracking for LoS / Admission avoidance initiatives to deliver phase 1
- × Christmas Implementation & Dependence of Key Resources

Benefits Realisation

- × COPS / LOS risks to achieving bed closures
- × Tight timeframe for Bed Reductions at Singleton
- × Impact of recruitment % on deliverable outcomes (i.e. Virtual wards)
- × Implementation and Perpetuation of changes to ways in working to deliver bed reductions at each stage

Workforce Planning

- × Gaps exist in future and current workforce. (150+ WTE in nursing)
- × Recruitment planning to fill gap(s)
- × Consultant roster changes to cover new rotas
- × Ward Sisters are all <12months in post? (Could be a good thing)

Communications & Change Management

- × Lack of evidence of a structured approach to delivering change to win hearts and minds
- × Reliance on internal resourcing to deliver change and project agenda
- × Number of initiatives hitting staff in one go

Financial(s)

- × Cost risk vs budget through extensive use of agency/bank
- × Cost risks of beds being blocked / remaining open

Policies & Procedures

- × New SOP's identified and being written
- × Updates and process ongoing

Business Processes

- × End-to-end processes / flow still being tweaked
- × Detailed business processes still being finalised
- × Management control system

Staff Training

- × Skills gap for "Acute" specialists
- × No scheduled change management training

© MERIDIAN PRODUCTIVITY 2022

Key Risks to Manage Through Implementation Plan

- Delivery and perpetuation of LoS reduction and Admission avoidance initiatives
- Recruitment of Nurses to fill vacancies
- Clinically Optimised Patients
- Community Capacity & Demand

© MERIDIAN PRODUCTIVITY 2022

Focus on Admission Avoidance and reducing Length of Stay

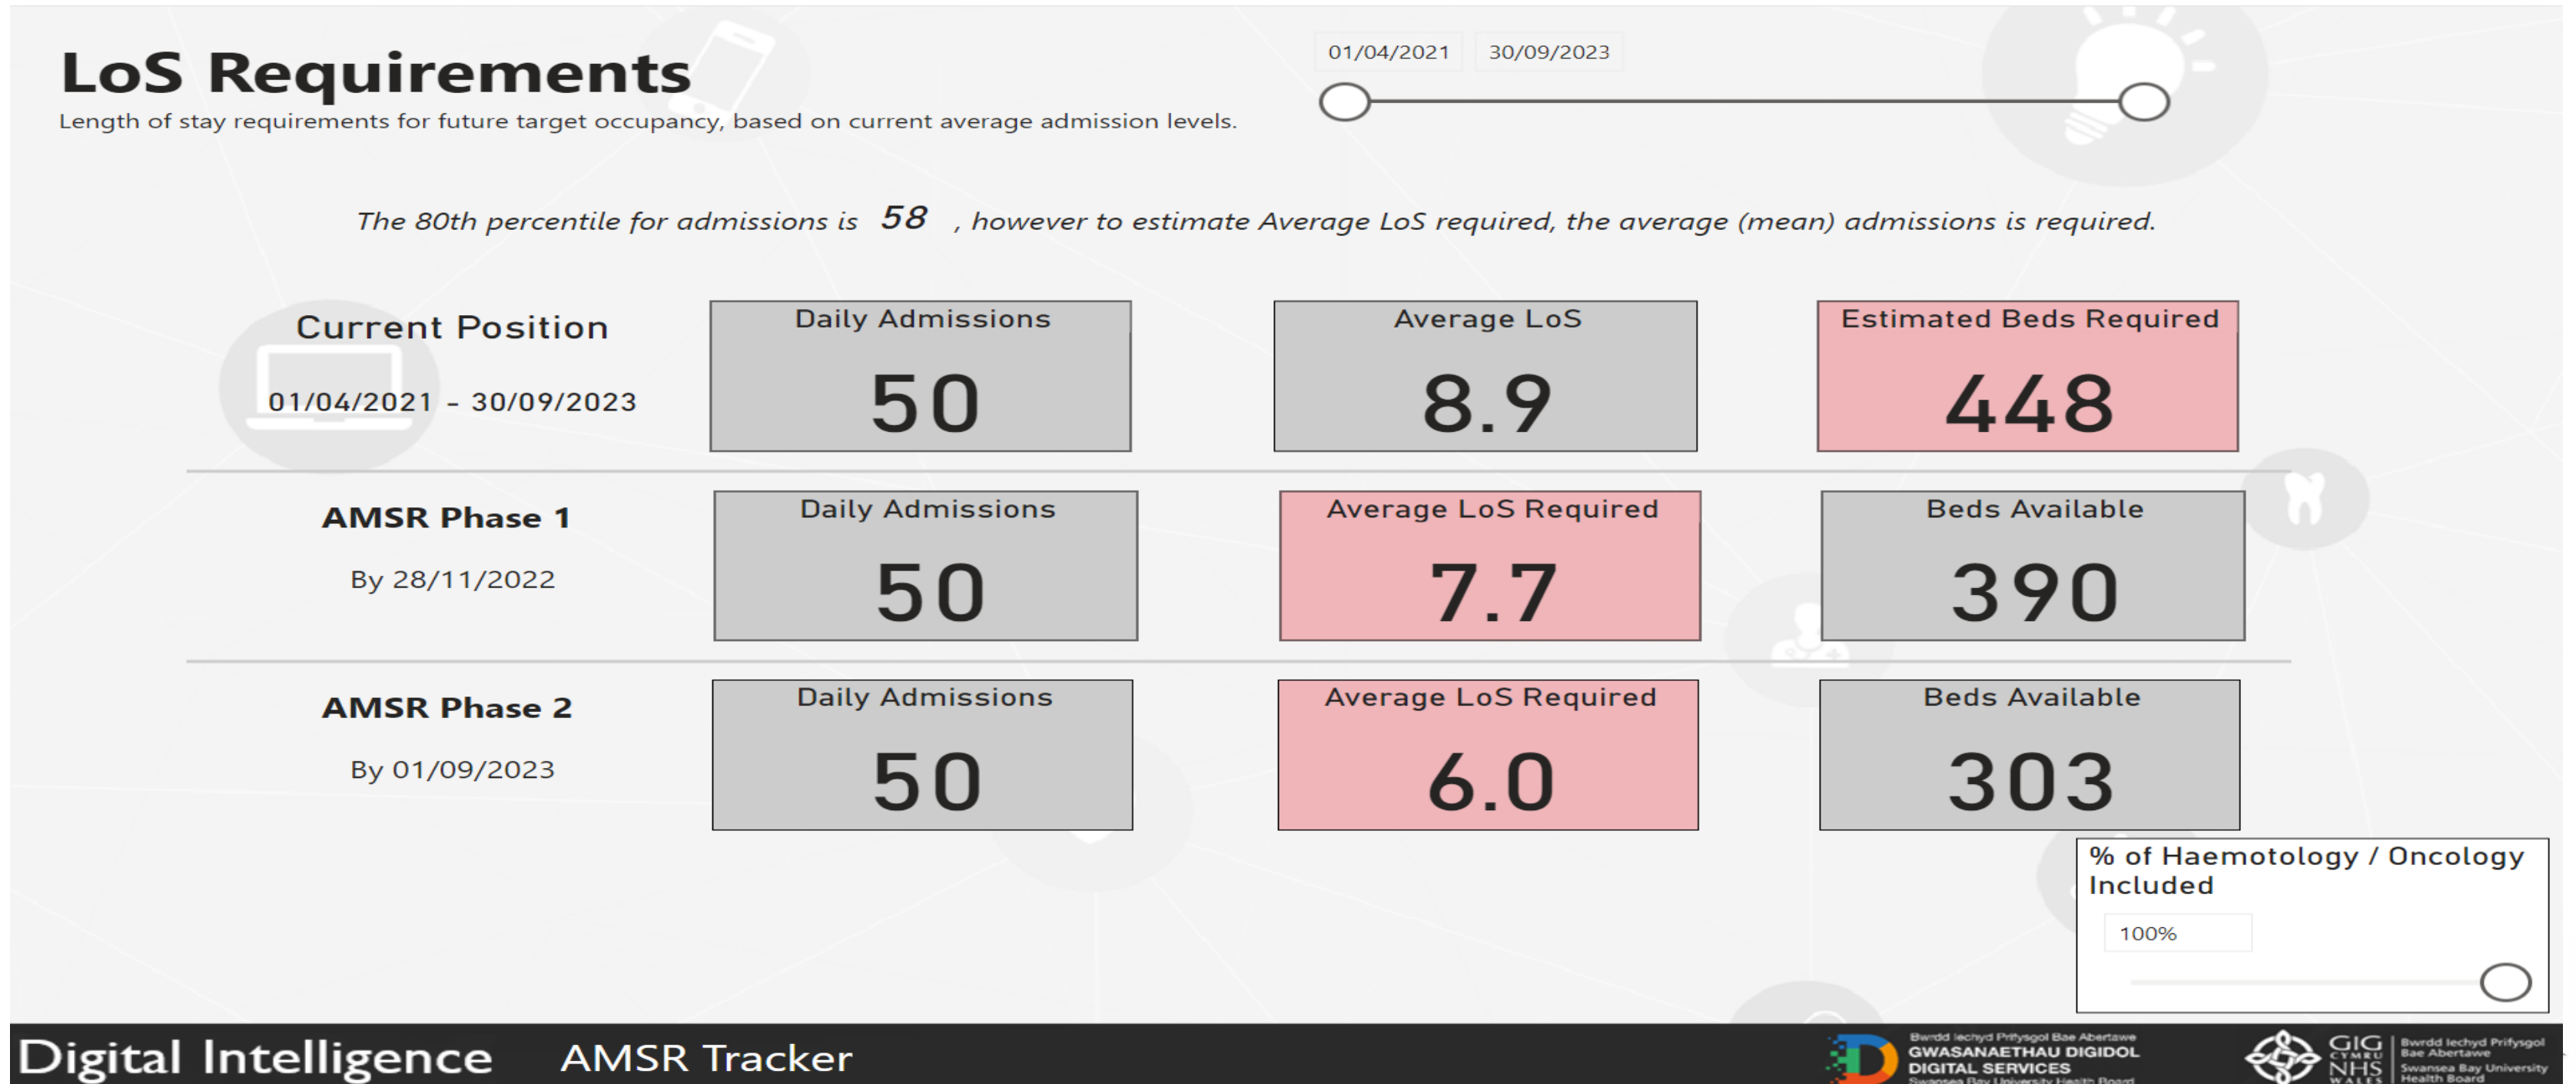

What does the data tell us about changes in activity since the initial modelling in the business case?

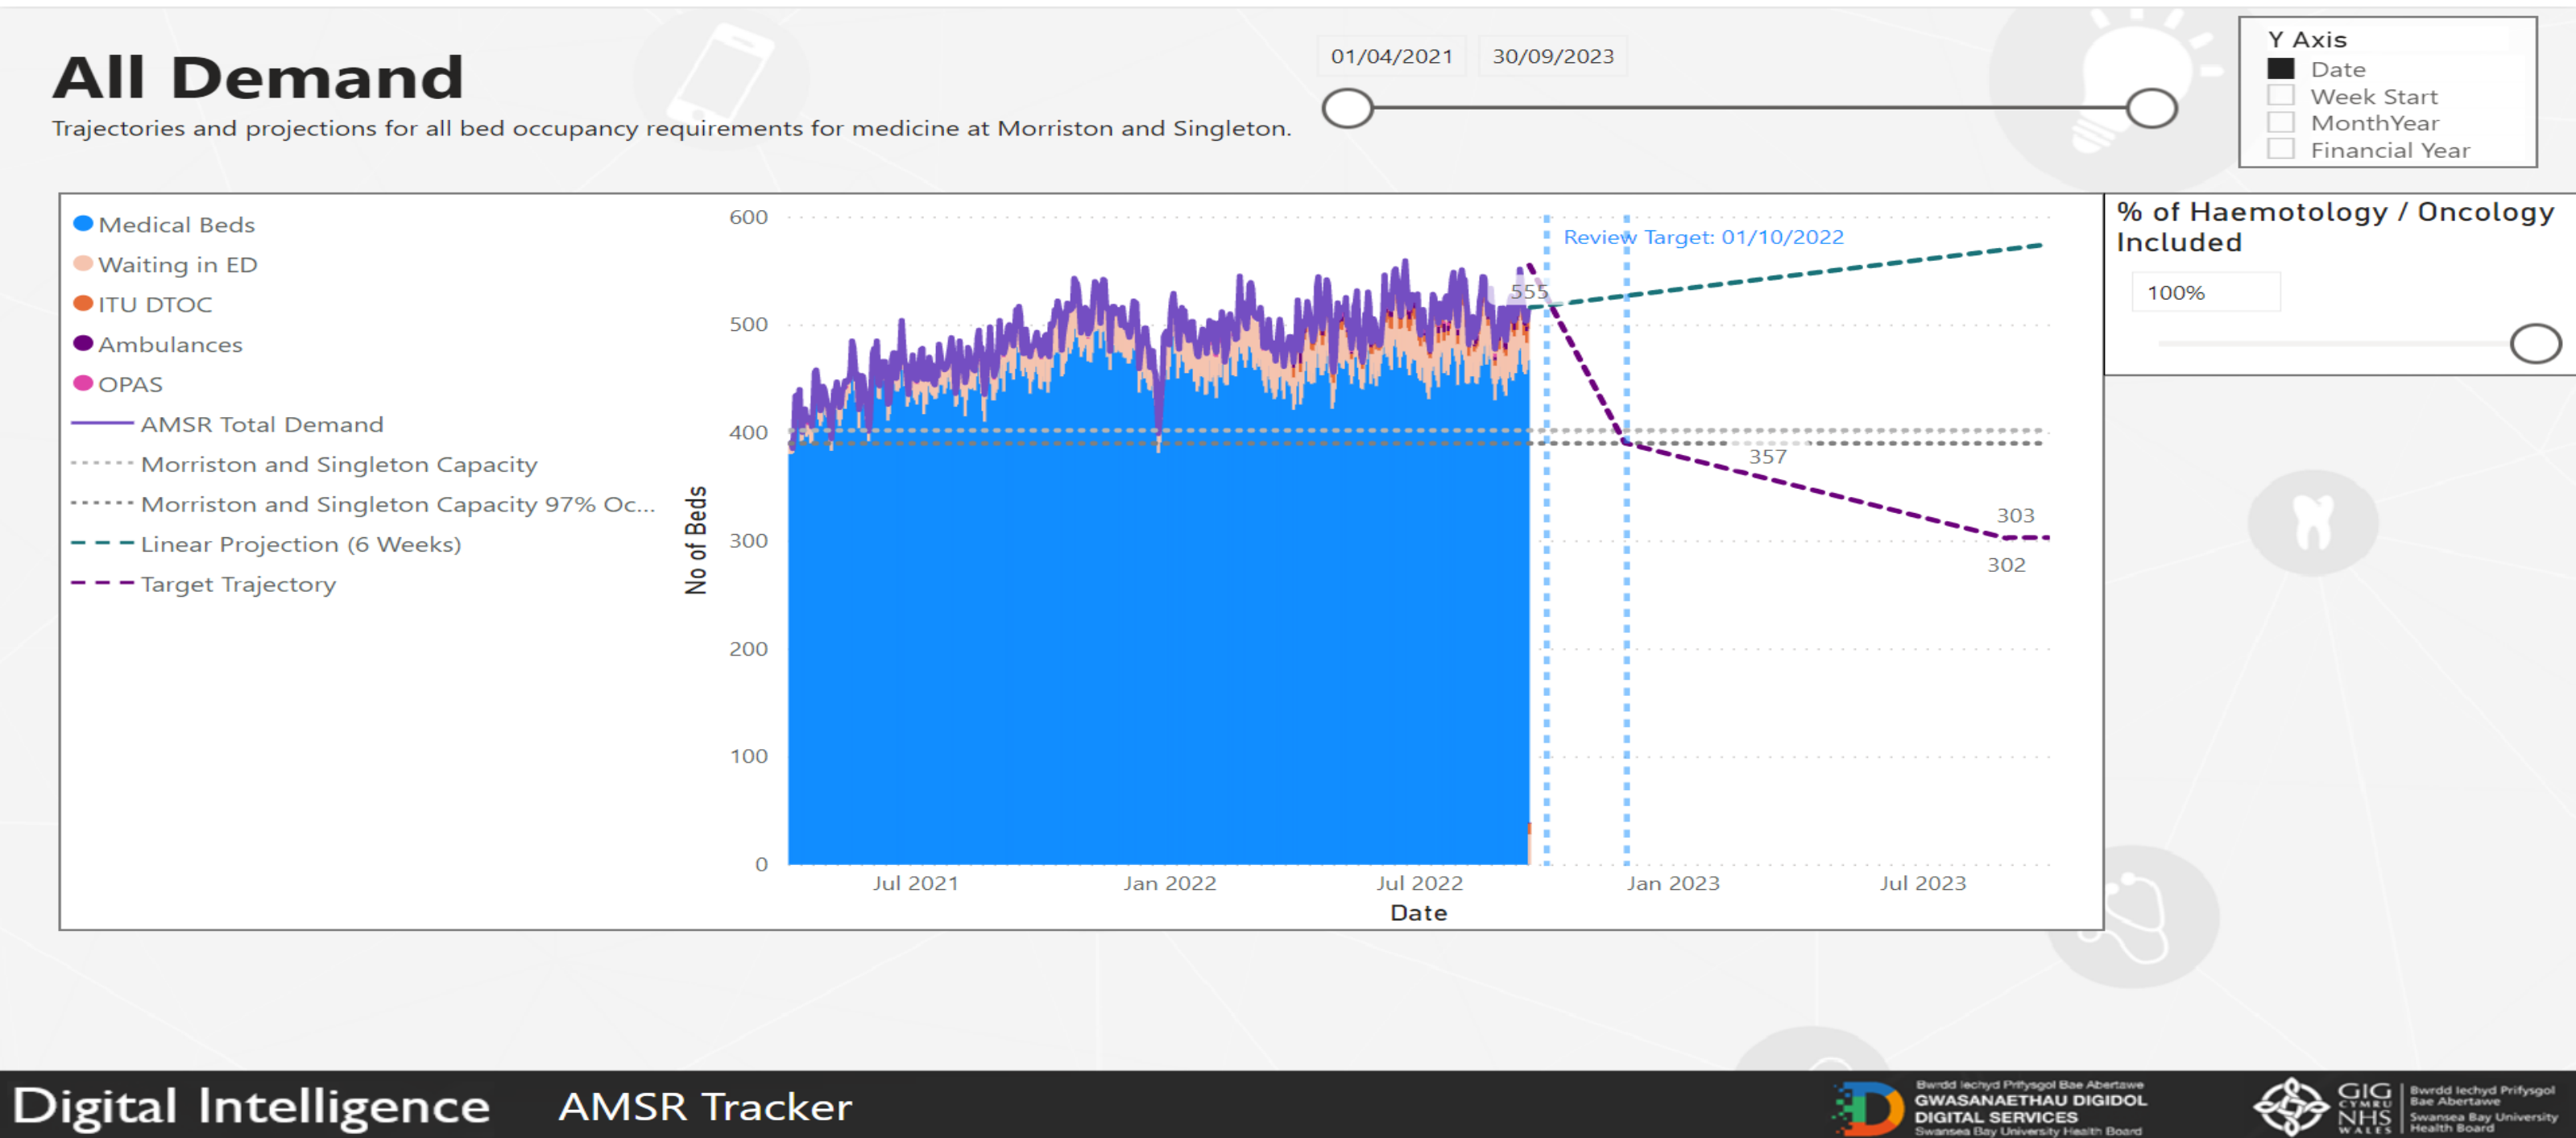

- Since the development of the business case, admissions and LOS have reduced for medicine across Singleton and Morriston: - 80 to 50 admissions on average and LOS from 11.8 to 9.1days.
- Most significant impact on the reduced admissions is associated with: increase in patients in ED who would otherwise be admitted; impact of WAST stack review, UPCC and OPAS and impact of the virtual wards.
- LOS reductions are noted at Singleton due to the reduction in referrals as an impact of the activities within SDEC to re-direct pathways and manage in an alternative way.
- LOS at Morriston has increased slightly due to the impact of the patients not being admitted who have a short length of stay; increase in LOS of patients in the COP phase of their pathway; impact of covid in not supporting patients being accepted into PoC; delays in transferring to Pathway 3 beds due to significant increases in LOS at Gorseinon and NPT associated with COPs. Targeted work with Improvement Cymru focused on board rounds and real time data to support discharge has supported the use of data to support decision making.

What does the data tell us for LOS?

Total Medicine Demand – Singleton and Morriston

AMU Demand -<48hrs

AMAU Demand

Trajectories and projections for all bed occupancy requirements for medicine at Morriston and Singleton for patients who have are in the first 48 hours of their stay.

Main Workstreams

- WAST stack review – commenced Feb 2022, WAST APPs joined in acute hub Jul 2022. Next stage –scope Home Visiting service (mid Oct 2022)
- Virtual wards – all eight operational and five day in-reach in place (mid Sep 2022) Next stage - #NOF pathway changes (Oct 2022)
- Rapid response Therapies 7 day working (Sep 2022)
- Home First In-reach (Sep 2022)
- Joint reablement model with LAs (Oct 2022)
- COPs review and escalation framework led by DCOO (commenced end of Aug 2022)
- Breaking cycle events (Oct and Nov 2022)
- Morriston ward re-alignment (Oct 2022)

Next Steps

- Bi-weekly monitoring of progress via Management Board
- Clinical engagement event on 04/10/2022
- Work with WAST to identify further opportunities for streaming away from ED (TBC)
- Confirm additional project implementation/improvement resource (Sep 2022)
- Step up communications including executive visibility

Communication Update

Additional support secured from an external company – Freshwater – in recognition of the requirement to increase capacity into the Healthboard communication team for the AMSR programme. Examples of areas of focus include:

Weekly newsletter developed by the AMSR leads providing updates, progress and areas of focus for the following week - now on 7th Bulletin - over 3,000 views

Series of short videos of members of the work streams sharing the message of the AMSR and what they are doing – completed and on intranet

Video tour of AMU – completed and on intranet

Weekly forum for Comms Champions established – 2 way communication from ward to Board

Planned - Story Boards being installed at the front entrances

Planned - Use of the tv screens in staff restaurants for providing regular updates and videos

Weekly staff bulletin: Issue 3, 2nd August 2022

Welcome to this week's AMSR programme board weekly staff bulletin. Each week we'll be reporting on progress as we implement this first important phase of the Changing for the Future programme. Working in partnership with you we are putting plans into practice that will lead to better patient outcomes and which give you, our staff, the kind of hospital facilities that will make you proud to work here.

Organisation Change Policy (OCP)

The AMSR OCP staff consultation came to a close last Friday, 29th July. Over the past six weeks, over 400 staff have attended 53 dedicated engagement sessions and 120 individual responses have been submitted.

We would like to take this opportunity to thank all staff for their participation and invaluable feedback; all of which will be considered alongside the output from the dedicated AMSR workstreams to help us shape and develop the proposed AMSR model as we move towards implementation.

We now go straight into a two-week review period after which we will issue a notice of change, setting out any amendments to the proposals resulting from staff input, and in which we will also explain the final model.

But the listening doesn't stop here. The AMSR change programme will run through to March 2023 and we will look to engage and inform our staff every step of the way, not just through news bulletins like this, but also in interactive workshops, through video and social media messaging and on the soon-to-be-developed, dedicated, Changing for the Future section of the staff intranet.

- 53 Dedicated Engagement Sessions
- 400+ Workshop Attendees
- 120 Consultation Responses

Specialist Wards workstream

This workstream's mission is to design the Acute Inpatient Care model which provides for patients' medical care from when they leave the AMU up to discharge, or transfer to another clinical setting.

The team is a real cross-section of colleagues both internal and external. At a recent workshop the following subgroups were established:

- Reconfiguration Group:** Looking at confirmation, clinical coverage and acceptance criteria for specialist wards.
- SOP & QIA Team:** We have standardised the SOP template and the team is finalising the SOPs for AMU, SDEC and Singleton wards.
- Singleton Wards:** This subgroup, led by senior nurses and OTs, has already standardised patient criteria incorporating patients' geographical place of residence, and is looking at the possibility of a therapies led ward.
- Discharge Group:** This team, made up of internal and external colleagues who are involved in the discharge

Specialist Ward Discharge workshop, 27 July

process, held a workshop on 27th July with virtual wards, social care providers and discharge leads. The team is focused on discharge pathways as a crucial enabler of good patient flow, especially for the Acute Medical Unit which is driven to by short stay patients.

The team will meet again in two weeks to work on a final solution.
