

Reporting Committee	Quality Patient Safety Committee
Chaired by	Emrys Elias
Lead Executive Director	Director of Nursing & Quality
Date of Meeting	13 October 2020
Summary of key matters considered by the Committee and any related decisions made	
<p>1. Development Day Committee members received a summary of the development day which was held on 15 September. Feedback from the event had been positive and all Health Boards were represented. The event will be held on an annual basis.</p> <p>2. Terms of Reference Members received and considered a paper with revised Terms of Reference. Members noted the revisions to Sections 13 and 14 of the Terms of Reference presented and resolved to approve the revised Terms of Reference for recommendation to the Joint Committee for final approval.</p> <p>3. Renal Network The Chair of the Renal Network asked the committee to note that guidelines have been developed and approved regarding the use of PPE in renal dialysis and reminded Health Boards that it was their responsibility to ensure that there was an adequate supply available to support the guidelines.</p> <p>4. Commissioning Team updates Reports from each of the Commissioning teams were received and taken by exception. Members noted the information presented in the reports and a summary of the services in escalation is attached to this report. The key points for each service are summarised below:</p> <ul style="list-style-type: none"> Cancer and Blood <p>Members were updated on the risks to thoracic surgery provision for lung cancer patients in mid and south west Wales as a result of COVID-19. A single prioritised waiting list and collaborative working will ensure equitable access to the available capacity in both centres based on clinical need regardless of the patient's area of residence. The single pathway has the ability to refer to other centres depending on capacity and the urgency of treatment.</p>	

- **Cardiac**

Members received an updated position regarding cardiac surgery services. It was noted that the WHSSC Corporate Directors Group had recognised the expertise of both the vascular and the TAVI team within SBUHB and given the assurance regarding the governance and safety aspects of recommencing this procedure received, they were able to recommence sub-clavian access. Ongoing work would continue to consider a longer term regional model.

Concern was raised regarding the length of time that cardiac services had been in escalation. Whilst assurance was given that a number of measures had been taken to address the issues within the given timeframe. Internal work was ongoing on reviewing the escalation process, performance framework and the impact of COVID-19 on RTT. That work would be presented at the next meeting on 19 January 2021.

Members were informed that there had been a COVID-19 outbreak on the cardiac ward at Morriston Hospital. All elective work would be suspended for a two week period as a consequence. Welsh Government and neighbouring Health Boards had been informed.

- **Mental Health & Vulnerable Groups**

A detailed summary of the services in escalation was received. It was noted that an enhanced recovery plan was required for this the Forensic Adolescent Consultation & Treatment Service (FACTS) and as a result was being placed into escalation level 3. The provider had been notified.

Members were made aware of a recent serious untoward incident in the South Wales Tier 4 CAMHS unit which was already in escalation level 3. In addition members were notified that the Health Board had also placed the serviced in enhanced monitoring with Executive oversight. The NCCU Quality Assurance Improvement Service (QAIS) has also joined the working party to consider some of the issues relating to concerns with the doors and would be undertaking a formal visit to the unit next week. HIW are also into the process of undertaking a Tier 1 quality check on the service and the report will be shared with WHSSC once available.

Members were informed that due to a National bed crisis in CAMHS a bed management bureau had been set up to coordinate admissions and discharges to facilitate patient flow and ensure a consistent approach.

Regis Healthcare has had a second outbreak of COVID-19 on the unit. Individual risk assessments are being undertaken prior to admission to balance the risk of admitting to the unit at this time. Public Health Wales are involved in all discussions.

Members received a detailed update on the adult mental health complex case and recent developments.

On 22 September NHS England announced that they have commissioned an independent review of the Tavistock & Portman Foundation Trust Gender identity Development Service (GIDS). The findings will be presented to NHS England and Improvement's Quality and Innovation Committee at the end of the year. It will focus on how care can be improved for children and young people including key aspects of care such as how and when they are referred to specialist services, clinical decisions around how doctors and healthcare professionals support and care for patients with gender dysphoria. The Care Quality Commission (CQC) is due to carry out a focused inspection of The Tavistock and Portman NHS Foundation Trust, Gender Identity Services for children and young people, during the autumn. The inspection will cover parts of the safe, effective, caring, responsive and well-led key questions and will include feedback from people using the service, parents, relatives, carers, and staff. A Judicial Review involving the Tavistock & Portman is also currently ongoing.

- **Neurosciences**

Members received an update that since September 2019, the service had reported zero breaches >36 weeks due to the COVID-19 pandemic but that the situation had now changed and the WHSS Team was aware that patients were waiting in excess of 52 weeks.

- **Women & Children's**

It was reported that the Task and Finish Group set up to support the development of the service specification and process for selecting a Lead Provider to deliver a 24/7 service had met on three occasions. The service specification was complete and would be published once agreed through the WHSSC Policy Group. There was however a lack of support from some of the clinicians on the Task and Finish Group for the Lead Provider model, mandated by the Joint Committee decision in March 2020. As a consequence a discussion would be taken back to Joint Committee at its meeting in November. In the interim though all Health Board providers of neonatal transport and WAST had been asked to confirm their operational plans, timelines and costs to deliver an interim 24 hour service. Responses were due to be returned to WHSSC by the end of October with an anticipated start date within 3 months

Concern was expressed by the QPS Committee on the differential rates of recovery across providers in Wales and England and the impact this is having on access to specialised services and the potential inequity. The example of paediatric surgery was of particular concern to the Committee resulting in longer waiting times in Welsh providers than in English ones.

The Committee discussed the backlog in cleft surgery at Swansea Bay University Health Board and the impact that this could have on a child's development. It was noted that Health Boards are using the Royal College of Surgeon prioritisation process to manage surgical waiting lists but that this process did not always work well for children who need surgery at specific stages of their development rather than in a month, 3 months etc. The Committee noted that the WHSS Team had raised this with Welsh Government and Health Boards.

5. Other Reports received

Members received reports on the following:

- **CQC/HIW Summary Update**
- **WHSSC Policy Group Report**
- **Concerns and SUI Report**
- **Risk Management Update**
- **Safeguarding Report**

Key risks and issues/matters of concern and any mitigating actions

Summary of services in Escalation (Appendix 1 attached)

Matters requiring Committee level consideration and/or approval

1. Neonatal transport paper to be considered at next Joint Committee
2. Joint Committee already aware of high risk complex mental health case
3. Changes to services in escalation and further work required on processes

Matters referred to other Committees

Safeguarding Report to CTMUHB (host organisation) Executive Safeguarding Group

Confirmed Minutes for the meeting are available from <http://www.whssc.wales.nhs.uk/quality-and-patient-safety-committee-con>

Date of next scheduled meeting:	19 January 2021
