Director Lead: Sian Harrop-Griffiths, Director of Strategy Assuring Committee: Performance and Finance Committee / Strategy, Planning and Commissioning Group Health Board																																								
Risk: Operational and strategic decisions are not data informed:- Health Board does not have an IMTP signed off by WG, primarily due to the inability to align performance and financial plans. WG also advised that the Health Board needed to have a clear strategic direction by developing an Organisational Strategy and refreshing our Clinical Services Plan. In September 2016, the Health Board was escalated to 'targeted intervention' and having an approved IMTP is a key factor in improving our WG monitoring status. Current Risk Rating 4 x 4 = 16		Additional Comments The service is now in the 2nd cycle of CAPA with new job plans agreed from January, with updated demand & capacity mapping. WLI Clinics initiated at POW Hospital, Bridgend which enabled the 80% target to be achieved by end of end March. This was also achieved for NPT area. However Swansea had a																																								

significant backlog, which is starting to be addressed with waiting list initiatives from March 2018.

Primary & specialist CAMHS services are delivered by Cwm Taf University Health Board on behalf of ABMU (although this will only be for Swansea & NPT from 1/4/19).

Cwm Taf achieved the non-urgent 28 day target for specialist CAMHS by the end of March 2019. Their ability to sustain this performance is dependent on consistency and availability of staff which due to the small numbers in the various CAMHS teams can affect achievement of waiting times significantly.

Risk Rating (consequence x likelihood): Initial: 5 x 4 = 20 Current: 4 x 4 = 16 Target: 4 x 2 = 8		Rationale for current score: The Health Board has limited assurance regarding whether or not it is compliant with Home Office Controlled Drug Licensing requirements at the present time, nor does it currently have processes in place to ensure any future service change complies. Risk: That the Health Board is operating in breach of the law by managing controlled drugs without an appropriate Home Office Controlled Drug License. Legal advice provided to the Health Board has indicated that failure to comply with the Home Office Controlled Drug licensing requirements could result in criminal and civil action, both against responsible individuals and the Health Board as a public body. Work has commenced to fully understand the licensing situation along with the drafting of a detailed policy that will ensure compliance going forward. Risk: That the Health Board is maintaining unnecessary Home Office Controlled Drug Licenses. Each Home Office Controlled Drug license costs around £3k plus additional administrative set-up and maintenance costs. Health Board wide scrutiny is required to ensure no unnecessary licenses are held (one such example has recently been discovered).	
Level of Control = 40%		Rationale for target score:	
Date added to the risk register January 2019		Once the new policy is complete and has been checked for legal compliance to the Home Office regulations there will be a training session held with all clinical areas supported at Executive level. This forms the basis of a detailed policy that is currently in draft form. This will be sent for legal ratification to ensure compliance to the Home Office regulations. The Home Office have been advised work is currently being completed as a matter of urgency.</p> <p>Areas of specific concern regarding license compliance are being visited to enable an accurate assessment.</p> <p>Additionally work is underway to develop a governance framework to ensure responsibility for management and use of controlled drugs is fully understood within the delivery units. The framework will enable both the Controlled Drug Accountable Officer and the Health Board Medical Director to discharge their individual accountabilities.</p> <p>The Executive Medical Director, the Executive Director of Nursing and the Chief Pharmacist/CDAO are fully involved and supportive of any potential changes for delivery units.</p>	<p>Training session to be held for all clinical areas. All delivery units will be required to identify a responsible manager and ensure compliance with both the CD Licensing Policy and the new framework for management and use of controlled drugs.</p>	<p>Clinical Director of Medicines Management (Pending internal corporate governance review of controlled drugs governance in new organization)</p>	<p>December 2019 (Pending policy development and sign off in conjunction with Home Office)</p>
<p>Assurances (How do we know if the things we are doing are having an impact?)</p> <ul style="list-style-type: none"> To date the HB has received legal advice. Pending policy development, the principles contained within the legal advice are referred to when issues are raised in order to provide consistency in arrangements. 	<p>Gaps in assurance (What additional assurances should we seek?)</p> <p>The Health Board will develop a license compliance register, this is expected to be maintained by the Corporate Governance Team thus ensuring there is sufficient segregation of duty.</p>		
<p style="text-align: center;">Current Risk Rating 4 x 4 = 16</p>	<p style="text-align: center;">Additional Comments</p> <p>The Home Office are aware that the Health Board have sought independent legal advice regarding the situations where a Home Office Controlled Drug license is required. The Home Office are currently awaiting the Health Board policy on this matter so that they can review our position.</p> <p>Once completed the policy outlining the Health Board position on Controlled Drug licensing will be shared with both Welsh government and all other Health Boards in Wales as the Swansea Bay UHB position is likely to be used by the Home Office as a precedent.</p>

Lack of investment in new digital solutions to make services more effective will mean clinical service provision will become unsustainable. L- There has been an increase in the number of devices in circulation by 3000 (39%) over the last 4 years (2015-2018) without an increase in IT support capacity. HB are currently only able to replace devices that are over 7 years old. Call volumes and wait times have increased over the last 4 years. Key IT maintenance work is not being completed in a timely fashion. Investment required in Informatics to deliver the Digital strategy is greater than the funding currently available. Informatics budget is estimated to be 0.73% of the HB budget - well below the recommended 4%. Resources available to provide digital services could be reduced because of the boundary change.

Current Risk Rating 4 x 4 = 16		Additional Comments The most recent HB "completed & sent" performance was 60% (August 2017) compared with 48% a year ago. • In August 2017 the best performing hospital is NPTH (83%), this is reduced by the poor performance on wards not directly managed by NPT. Medical Wards regularly achieve 99% • August 2016 v August 2017 Delivery Unit comparisons demonstrate substantial improvement in Morriston, POW & Singleton • Morriston is coming to the end of a 6-month																																								

improvement programme which is bearing fruit, performance was 46% in March when it started.

MTeD went live on 10 wards (medicine) at Morriston Hospital on 20 May 2019. The delivery unit have also mandated that alongside MTeD, they are implementing a no discharge summary, no discharge policy with an escalation procedure for when patients are discharged without one.

Implementation across remaining wards is scheduled for later in the year when we are able to send surgical data with the discharge summary/operation note directly to GPs.

Risk: Cyber Security - high level risk <ul style="list-style-type: none"> The level of cyber security incidents is at an unprecedented level and health is a known target. The health board has increased digital services (users, devices and systems) and therefore the impact of a cyber security attack is much higher than in previous years. The introduction of the Network and Information Systems Directive (NISD) in May 2018 means that large fines can be issued to organisations that are not compliant with the Directive. A report from the department of health following the Wannacry incident in May 2017 stated that attack cost the NHS (England) £92m as 19,000 appointments were cancelled and this was before the NISD came into effect. The largest risk to the organisation is on user awareness and unsupported software (old versions which are no longer patched for security vulnerabilities) and devices not managed by the ICT department e.g. medical devices. The ICT department only has one ICT security manager and agreement is in place to recruit a Band 8A Cyber Security manager to provide strategic direction and develop action plans to address the risks highlighted in the Stratia Report as well as ensuring the Health Board complies with NISD. There are also 2 x band 6 WTE positions agreed pending release of funding to build the team which are required to act on information provided by the national security tools. The national security tools will highlight vulnerabilities and provide warnings when potential attacks are occurring. Swansea Bay will adopt these tools in financial year 2019/20. The NHS in Wales is protected by a firewall by NHS Wales Informatics Service (NWIS). Swansea Bay UHB has advanced firewall protection to protect the network from potential cyber- attacks. <p>All emails coming into NHS Wales are scanned using the national email filter. Whilst malicious emails come into the health board on a daily basis, the number are vastly reduced using the email filter and NWIS issue warnings to users affected when the contents are discovered (same day). Users are warned to delete emails and if opened, contact ICT service desk for investigation.</p> <p>A patching regime has been in place around 18 months which ensures desktops, laptops and servers are protected against any known security vulnerabilities. Anti-virus is in place to protect against known viruses with intelligent scanning on potential viruses not yet discovered.</p> <p>Access to the internet is controlled through a smart filtering solution which restricts access to potentially vulnerable content.</p> <p>Work is ongoing in order to replace out of date systems, this is a huge task given the number of clinical and administrative systems in place across the health board. The creation of the service management board will help in terms of getting stakeholder agreement and engagement. Capital funding has also been available to address this.</p> <p>A Cyber Security training module has been developed and available in the Electronic Staff Record training to ensure staff are fully aware of the risk of cyber security and are vigilant in recognising malicious activity e.g. malicious email. This needs to be adopted as mandatory training.</p>			
<p>Assurances (How do we know if the things we are doing are having an impact?)</p> <p>This will be developed following the appointment of the Cyber Security Manager.</p> <p>In the meantime, the follow up Stratia report has confirmed a major improvement in terms of Microsoft Security patching and SBU are compliant with standards agreed.</p> <p>The Cyber Assurance Framework (compliance with NISD) has been submitted to the Operational Security Service Management Board and plan will be developed nationally to address areas of non-compliance.</p>	<p>Gaps in assurance (What additional assurances should we seek?)</p>

Objective: Screening for Fetal Growth Assessment in line with Gap-Grow (G&G)		Director Lead: Gareth Howells, Director of Nursing and Patient Experience Assuring Committee: Quality and Safety Committee Date last reviewed: November 2019																																									
Risk: There is evidence a growth restricted/small for gestational age fetus (SGA), has an increased risk of intra-uterine death before or during the intrapartum period. Identification and appropriate management for SGA in pregnancy should lead to improved outcomes. GAP & Grow standards were implemented to contribute to the reduction of stillbirth rates in wales. Obstetric USS scan appointments are at capacity leading to delays in obtaining required appointments. In addition the guidance from Gap & Grow is for women requiring serial scanning with a risk factor for a growth restricted baby must have 3 weekly scans from 28 to 40 week gestation. Due to the scanning capacity there are significant challenges in achieving this standard.		Rationale for current score: CSFM's leading on audit reviewing records of all women where SGA not identified in antenatal period. Scanning capacity under increasing pressure. Meeting arranged with radiology management to discuss introduction of midwife sonographer third trimester scanning. Staff to be informed to submit Datix incident where scan not available in line with standards.

Controls (What are we currently doing about the risk?)		Mitigating actions (What more should we do?)																																								
<p>Current controls include all staff undertaking RCOG CTG training and competency assessment. Protocol in place for an hourly "fresh eyes" on 'intrapartum CTG's' and jump call procedures. CTG prompting stickers have been implemented to correctly categorise CTG recordings. Central monitoring is also expected to strengthen the HB's position in defending claims. K2 fetal monitoring system has been identified as the best option for a central monitoring system.</p>		<table border="1"> <thead> <tr> <th>Action</th> <th>Lead</th> <th>Deadline</th> </tr> </thead> <tbody> <tr> <td>Business case prepared for Central monitoring system to store CTG recordings of fetal heart rate in electronic format.</td> <td>Deputy Head of Midwifery</td> <td>20th December 2019</td> </tr> <tr> <td>Identified need for midwife for fetal surveillance training and support to improve knowledge through increased support and training in the clinical areas as well as support for the formal training programme within SBUHB.</td> <td>Deputy Head of Midwifery</td> <td>30th November 2019</td> </tr> </tbody> </table>		Action	Lead	Deadline	Business case prepared for Central monitoring system to store CTG recordings of fetal heart rate in electronic format. Risk Score Calculation

For each risk identified, the LIKELIHOOD & CONSEQUENCE mechanism will be utilised. Essentially this examines each of the risks and attempts to assess the likelihood of the event occurring (PROBABILITY) and the effect it could have on the Health Board (IMPACT). This process ensures that the Health Board will be focusing on those risks which require immediate attention rather than spending time on areas which are, relatively, a lower priority.

Risk Matrix	LIKELIHOOD (*)				
	1 - Rare	2 - Unlikely	3 - Possible	4 - Probable	5 - Expected
1 - Negligible	1	2	3	4	5
2 - Minor	2	4	6	8	10
3 - Moderate	3	6	9	12	15
4 - Major	4	8	12	16	20
5 - Catastrophic	5	10	15	20	25
