

Statement from the Council

As members of the governing body of the Nursing and Midwifery Council, we agree with the executive board's response to the report by Nazir Afzal and Rise Associates which has shone a spotlight on the disturbing accounts of the organisation's culture. We apologise to those who have experienced racism, discrimination and bullying. And we apologise to the public, registrants and colleagues involved in fitness to practise cases that are taking too long to resolve and recognise the toll this takes on all involved.

Implementing the recommendations of the report will now become a central priority for the NMC, and we commit ourselves to fully supporting the executive team, who will take this work forward with urgency.
