	Secondary Care			40,748	28,880	27,667

Please note that we cannot provide patient numbers but we have provided information on dose units (i.e. individual tablets dispensed) for both primary and secondary care broken down for each month. Secondary care data is only available from 2018 onwards.

Please further note that due to data completeness in our systems, the figures for Primary Care in November and December 2020 are not yet available.
