You asked:

Could you please tell me if your health board most commonly uses the National Early Warning Score (NEWS) 2, patient assessment tool, and if not, which assessment tool they use instead?

I can confirm that Swansea Bay Health Board uses 'NEWS 2 in a Welsh context' commonly known as 'NEWS Cymru', essentially the same as NEWS without the two oxygen saturation parameters.

This is in line with a decision made by the All Wales RRAILS Steering Committee, at the end of 2019. As there was little evidence to support the two oxygen saturation parameters.
