You asked:

1. How many surgical robotic systems does the Health Board own and what make/model are they?
2. How many operations (per procedure) have been completed using each of these robots in the last financial year?
3. How much was spent on disposables for these robots in the last financial year?
4. Do operations with these robots take longer than the operation would without them?
5. Do patients stay longer in hospital post operatively after robotic surgery?

Our response:

I can confirm that SBUHB do not own any surgical robotic systems.
