You asked:

1. How many patients were treated for Hepatitis C in financial year 2022/23?

119 treatments were started for Hepatitis C in 2022/23. Please note that some individuals may have started more than one course of therapy within the date range.

2. Was the target for treating patients with Hepatitis C achieved and what are the identified targets for 2023-24?

The target for 2022/23 was to complete 205 treatments. The target for 2023/24 is the same.

Please note that this target was not met in 2022/23 as 205 referrals for treatment were not received, therefore it was not possible. In order to increase this and meet future targets, community testing has increased and this is expected to be expanded on further in the coming twelve months.
