Dear

Your maternal serum screening report is attached. This shows you have a **lower chance** result for Down's syndrome, Edwards' syndrome and Patau's syndrome if you had Combined screening or a **lower chance** result for Down's syndrome if you had the Quad test.

You can access information online about this test at:
www.antenatalscreening.wales.nhs.uk/public/antenatal-screening-tests

If you wish to discuss this test further you can telephone us or contact your community midwife.

Please keep the enclosed result within your maternity records.

Yours sincerely

Antenatal Clinic Midwifery Team
